- React JS
- Python
- Bash
- SQL
- Java
- HTML

EDUCATION

ASSOCIATE IN INFORMATION TECHNOLOGY

Nueva Ecija University of Science and Technology

2011 - 2013

PROFILE

Passionate tech enthusiast transitioning into Web Development, eager to build scalable and efficient applications. With a background in Data Engineering and ETL development, I am expanding my skills to create practical and innovative solutions. Committed to contributing to the tech industry and fostering a culture of collaboration and growth.

EXPERIENCE

Recent project:

- Developed ETL pipelines, conducted unit testing, and documented Bash and SQL scripts for a Data Migration project.

Personal Projects:

- Auli's Playground – A gaming website for my daughter, built using React.js. Live Demo
- Anthony's Home Appliance-Repair Ticketing System (AHARTS) – A ticketing system for my father's home appliance repair shop, built using Python. GitHub Repository
- My About Website – Live Preview

Past Projects:

- Data Ingestion Development – Developed ETL jobs using Talend Studio with Java, including SIT and UAT documentation.
- Macro Development – Automated repetitive tasks in Excel using complex formulas and VBA macro scripting.
